

# JOURNAL OF COLLOID AND INTERFACE SCIENCE

## EDITORS-IN-CHIEF

Milton Kerker  
*Clarkson College of Technology*  
*Potsdam, New York*

A. C. Zettlemoyer  
*Lehigh University*  
*Bethlehem, Pennsylvania*

## ADVISORY BOARD

C. H. Amberg  
*Ottawa, Canada*  
E. W. Anacker  
*Bozeman, Montana*  
B. Bijsterbosch  
*Wageningen, The Netherlands*  
D. A. Cadenhead  
*Buffalo, New York*  
Eric J. Clayfield  
*Cheshire, England*  
N. V. Churaev  
*Moscow, U.S.S.R.*

I. Gallily  
*Jerusalem, Israel*  
H. Leidheiser, Jr.  
*Bethlehem, Pennsylvania*  
B. Y. H. Liu  
*Minneapolis, Minnesota*  
D. Napper  
*Sydney, Australia*  
A. W. Neumann  
*Toronto, Canada*  
J. F. Padday  
*Middlesex, England*

V. A. Parsegian  
*Bethesda, Maryland*  
Howard Reiss  
*Los Angeles, California*  
Kozo Shinoda  
*Yokohama, Japan*  
Lloyd A. Spielman  
*Newark, Delaware*  
William H. Wade  
*Austin, Texas*  
M. van den Tempel  
*Vlaardingen, The Netherlands*

NUMBER 1, JULY 1976

|                                                                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| OBITUARY.....                                                                                                                                                                                                              | iii |
| PATRICK B. BRILEY, ARTHUR R. DEEMER, AND JOHN C. SLATTERY. Blunt Knife-Edge and Disk Surface Viscometers.....                                                                                                              | 1   |
| STIG FRIBERG, IRENA LAPCZYNSKA, AND GUNILLA GILLBERG. Microemulsions Containing Nonionic Surfactants—The Importance of the PIT Value.....                                                                                  | 19  |
| M. PLAISANCE AND L. TER-MINASSIAN-SARAGA. Spread Insoluble Cationic Polysoap Monolayers. I. Specificity of Counterion Binding and Surface Potential..                                                                      | 33  |
| MADHAV B. RANADE, DONALD K. WERLE, AND DARSH T. WASAN. Aerosol Transport through a Porous Sampling Probe with Transpiration Air Flow.....                                                                                  | 42  |
| F. MACRITCHIE. Monolayer Compression Barrier in Emulsion and Foam Stability.                                                                                                                                               | 53  |
| H. J. L. WRIGHT AND J. A. KITCHENER. The Problem of Dewatering Clay Slurries: Factors Controlling Filtrability.....                                                                                                        | 57  |
| STEPHAN A. LETTS, TOMLINSON FORT, JR., AND JEROME B. LANDO. Polymerization of Oriented Monolayers of Vinyl Stearate.....                                                                                                   | 64  |
| FREDERICK A. BETTELHEIM, TAILER J. Y. WANG, AND ROBERT BRZUSTOWICZ. Dynamic Light Scattering of Bovine Cornea.....                                                                                                         | 76  |
| SENTARO OZAWA, SEIICHIRO KUSUMI, AND YOSHISADA OGINO. Physical Adsorption of Gases at High Pressure. IV. An Improvement of the Dubinin-Astakhov Adsorption Equation.....                                                   | 83  |
| M. BHANOT AND B. R. JENNINGS. Transient Light Scattering from Halloysite Suspensions.....                                                                                                                                  | 92  |
| A. G. BEZUS, A. V. KISELEV, A. A. LOPATKIN, AND L. G. RYABUKHINA. Molecular Statistical Calculation of Thermodynamic Characteristics of Neopentane Adsorption by Zeolite NaX.....                                          | 100 |
| TREVOR GEORGE LAMOND. Carbon Black Porosity. I. Interparticle Capillary Condensation in Pelletized Carbon Blacks.....                                                                                                      | 109 |
| TREVOR GEORGE LAMOND. Carbon Black Porosity. II. Selection of <i>t</i> -Values for Carbon Blacks.....                                                                                                                      | 116 |
| M. CLAUSSE, P. SHERMAN, AND R. J. SHEPPARD. Dielectric Properties of Benzene-in-Water Microemulsions in the Frequency Range 100 kHz-5 MHz.....                                                                             | 123 |
| SHOICHI IKEDA, KAORU TANEMURA, AND AKIRA KOJIMA. Sorption of Water Vapor on Poly-S-carboxymethyl-L-cysteine and Its Sodium Salt.....                                                                                       | 132 |
| B. d'EPENOUX AND C. GAVACH. Interfacial Tension Variations due to a Constant Current Flow through an Interface of Two Immiscible Solutions—Potassium Halide, Water-Hexadecyl Trimethyl Ammonium Picrate, Nitrobenzene..... | 138 |
| FARUK NOME, SHUYA A. CHANG, AND JANOS H. FENDLER. Indicators in Benzene in the Presence of Polyoxyethylene (6) Nonylphenol.....                                                                                            | 146 |

|                                                                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| S. LEE SWARTZEN-ALLEN AND EGON MATIJEVIĆ. Colloid and Surface Properties of Clay Suspensions. III. Stability of Montmorillonite and Kaolinite.....                      | 159 |
| HANS-FRIEDRICH EICKE, JOHN C. W. SHEPHERD, AND ADRIAN STEINEMANN. Exchange of Solubilized Water and Aqueous Electrolyte Solutions between Micelles in Apolar Media..... | 168 |

## NOTES

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| LUIS ALZAMORA, J. M. RODRIGUEZ, AND P. MENDOZA. Physical Adsorption of Nitrogen, Oxygen, and Carbon Dioxide on Zinc Oxide..... | 177 |
| JOEL L. ZATZ. Free Energy of Adsorption of Nonionic Surfactants at the Saturated Air-Water Interface.....                      | 179 |
| J. A. FINCH AND G. J. LYMAN. The Marangoni Effect in Oil Droplet/Solid Attachment.....                                         | 181 |
| DAG ANDERSSON. Streaming due to a Thermal Surface Tension Gradient—A Summary.....                                              | 184 |

## LETTER TO THE EDITORS

|                                                           |     |
|-----------------------------------------------------------|-----|
| JOSEPH M. CROWLEY. On Mechanics of Bilayer Membranes..... | 186 |
|-----------------------------------------------------------|-----|

|                   |     |
|-------------------|-----|
| BOOK REVIEWS..... | 188 |
|-------------------|-----|

## NUMBER 2, AUGUST 1976

|                                                                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| TORBEN SMITH SØRENSEN, MARCEL HENNENBERG, ANNIE STEINCHEN, AND ALBERT SANFELD. Chemical and Hydrodynamical Analysis of Stability of a Spherical Interface.....                                                           | 191 |
| P. JOOS AND R. VANDEN BOGAERT. Alternating Electric Current across a Nitrobenzene-Water Interface. I. Adsorption Kinetics.....                                                                                           | 206 |
| P. JOOS AND R. VANDEN BOGAERT. Alternating Electric Current across a Nitrobenzene-Water Interface. II. Excitation of Longitudinal Waves.....                                                                             | 213 |
| GEORGE M. BELL AND SAMUEL LEVINE. The Electrostrictive Effect in Diffuse Charged Layers.....                                                                                                                             | 218 |
| SHIGENORI KUMAGAI AND SHOJI FUKUSHIMA. Adsorption of Nonionic Ethoxylated Surfactants on Titanium Dioxides and Their Dispersion Effect in Water. II. Differences by the Functional Group in Surfactant Molecule.....     | 227 |
| JOAQUIN CORTÉS. The Application of Temperature Programmed Desorption in the Study of the Surface of Aerosil.....                                                                                                         | 233 |
| HERSCHEL COHEN, BETTY W. SHEN, WILLIAM R. SNYDER, JOHN H. LAW, AND FERENC J. KEZDY. The Surface Pressure Dependency of the Enzymatic Hydrolysis of Lipid Monolayers. Enzyme Denaturation at the Air-Water Interface..... | 240 |
| ROGER W. PHILLIPS AND ROBERT H. DETTRE. Application of ESCA and Contact Angle Measurements to Studies of Surface Activity in a Fluoropolymer Mixture.....                                                                | 251 |

|                                                                                                                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| PAUL T. JACOBS AND E. W. ANACKER. The Effect of Hydroxyl Functionality in the Polar Head on Surfactant Aggregation Number and Dye Solubilization Efficiency.....                                                                                   | 255 |
| J. G. EBERHART. The Thermodynamic and the Kinetic Limits of Superheat of a Liquid.....                                                                                                                                                             | 262 |
| P. J. MURPHY, A. M. POSNER, AND J. P. QUIRK. Characterization of Partially Neutralized Ferric Nitrate Solutions.....                                                                                                                               | 270 |
| P. J. MURPHY, A. M. POSNER, AND J. P. QUIRK. Characterization of Partially Neutralized Ferric Chloride Solutions.....                                                                                                                              | 284 |
| P. J. MURPHY, A. M. POSNER, AND J. P. QUIRK. Characterization of Partially Neutralized Ferric Perchlorate Solutions.....                                                                                                                           | 298 |
| P. J. MURPHY, A. M. POSNER, AND J. P. QUIRK. Characterization of Hydrolyzed Ferric Ion Solutions. A Comparison of the Effects of Various Anions on the Solutions.....                                                                              | 312 |
| MILTON J. ROSEN. The Relationship of Structure to Properties in Surfactants. IV. Effectiveness in Surface or Interfacial Tension Reduction.....                                                                                                    | 320 |
| BJÖRN LINDMAN, NICOLE KAMENKA, AND BERNARD BRUN. Translational Motion and Association in Aqueous Sodium Cholate Solutions.....                                                                                                                     | 328 |
| BRIAN RAND. On the Empirical Nature of the Dubinin-Radushkevich Equation of Adsorption.....                                                                                                                                                        | 337 |
| LUIS ALZAMORA AND JOAQUIN CORTÉS. Numerical Analysis of the FHH Equation Parameters from Experimental Data.....                                                                                                                                    | 347 |
| G. I. MUKHAYER AND S. S. DAVIS. Interactions between Large Organic Ions of Opposite Charge. II. The Effect of Ionic Strength, Temperature, and Urea on the Interaction between Sodium Dodecyl Sulfate and Benzyltriphenylphosphonium Chloride..... | 350 |
| A. TENENBAUM, C. BERLINER, J.-M. RUYSSCHAERT, AND J. JAFFE. Conformation of Oligopeptides at the Air-Water Interface: A Fluorometric Study.....                                                                                                    | 360 |
| WEN HAI WU AND JER RU MAA. Condensation and Nucleation on the Surface of an Immiscible Liquid.....                                                                                                                                                 | 365 |
